08/12/26 In: 10:00AM Out: 10:30AM	Preschool	MORTE III, ROBERTO CBRS2627S0093066(ST-I)	F80.2 92507x1	Roberto transitioned well to and from the speech therapy room and presented with positive engagement while requiring moderate redirections to maintain focus throughout the session. The therapist targeted functional language and vocabulary using a Critter Clinic, doctor kit, "Spot" flip book, and a truck with a toolbox. Given moderate verbal, visual, and gestural cues and prompts, Roberto successfully labeled items, demonstrated action verbs during routine play (e.g., fixing with tools, examining animals), and answered simple WH-questions related to the storybook. He continues to benefit from multi-modal support to sustain attention and expand functional communication, demonstrating steady progress toward his early communication goals. Date / Time	Setting	Child	ICD/CPT Codes	Notes	
08/12/26 In: 11:00AM Out: 11:30AM	Preschool	Brunson, Jeremiah CBRS2627S0093471(ST-I)	F82, F84.0 97530x1 97533x1	Jeremiah transitioned well to and from the speech room, presenting with positive engagement while requiring moderate redirections to maintain focus throughout structured play routines. The therapist targeted functional communication, vocabulary expansion, and multi-sensory engagement using a piggy bank, "Spot Goes to a Party" flip book, a sensory bin, an Elmo-in-a-box, and farm animal figurines. With moderate verbal, visual, and gestural prompts and cues, Jeremiah successfully labeled farm animals, demonstrated turn-taking and cause-and-effect concepts during play (e.g., placing coins in the piggy bank, operating the pop-up toy), and engaged with tactile elements while answering simple storybook questions. He continues to benefit from multi-modal cueing to sustain attention and foster expressive language development, demonstrating steady progress toward his early communication goals. 08/12/26 In: 11:30AM Out: 12:00PM	Preschool	Mitchell, KaeLee CBRS2627S0093485(ST-I)	F80.2 92507x1	Kaelee transitioned well to and from the speech therapy room, presenting with positive engagement while requiring moderate redirections to maintain focus throughout structured play routines. The therapist intervention targeted functional communication, vocabulary expansion, and joint attention using a piggy bank, an Elmo-in-a-box, an animal farm book, farm animal figurines with a play set, a singing duck, interactive songs, and a sensory bin. With moderate verbal, visual, and gestural cues and prompts, Kaelee identified farm animals, imitated animal sounds and song actions, demonstrated cause-and-effect concepts during play (e.g., inserting coins, operating pop-up toys), and engaged with tactile elements in the sensory bin. She continues to benefit from multi-modal support to sustain attention and foster expressive language development, showing steady progress toward her early communication goals. 08/13/26 In: 10:00AM Out: 10:30AM	Preschool	MORTE III, ROBERTO CBR2627S0093066(ST-I)	F80.2 92507x1	Roberto transitioned well to the speech therapy session and engaged in a variety of play-based and structured activities, including the "Around the Farm" book, animal figurines, Mega Legos, a ball ramp, color stacking cups, a toolbox with a truck, and the Critter Clinic. Throughout the session, Roberto demonstrated targeted language skills with moderate redirections, verbal/visual prompts, and tactile cues to maintain engagement and focus. Specifically, when interacting with the "Around the Farm" book, animal figurines, and Critter Clinic, he worked on answering WH-questions (e.g., "Where is the dog?", "What does the cow say?") to enhance overall auditory comprehension and expressive language skills. Additionally, during interactive play with the Mega Legos, ball ramp, stacking cups, toolbox, and truck, Roberto practiced identifying and using personal pronouns within simple sentence structures (e.g., "he/she" open the door, "my/your" turn) to support functional communication during structured turn-taking tasks. 08/13/26 In: 11:00AM Out: 11:30AM	Preschool	Mitchell, KaeLee CBRS2627S0093485(ST-I)	F80.2 92507x1	Kaelee transitioned smoothly into the session and participated in several multi-sensory and interactive activities, including animal farm figurines, an Elmo-in-a-box toy, a singing duck, fingerplays/songs, and the "Around the Farm" interactive book. Throughout the session, Kaelee required moderate redirections, verbal/visual prompts, and hand-over-hand assistance (specifically when operating the Elmo-in-a-box) to participate actively and maintain joint engagement. During song routines, the singing duck, and book reading, Kaelee worked on answering simple WH-questions and imitating environmental sounds to expand expressive output and auditory comprehension. Furthermore, during turn-taking routines with the farm animal figurines, Kaelee practiced identifying and labeling facilitate functional dynamic interaction in play. Date / Time	Setting	Child	ICD/CPT Codes	Notes	
08/13/26 In: 11:30 AM Out: 12:00 PM	Preschool # Children in Group: 2 SOTO D.	SOTO, DAVID CBRS2627S0089446(ST1-G)	F80.2 92508x1	David participated in a group speech therapy session with peer, engaging in a variety of collaborative, play-based and structured tasks, including the "Around the Farm" interactive book, animal figurines, stacking cups, and the ball ramp. Throughout the session, David demonstrated targeted language development while receiving moderate redirections, verbal/visual prompts, and tactile cues to support peer interaction, joint attention, and task completion. Specifically, during group reading and interaction with the "Around the Farm" book and animal figurines, David targeted answering WH-questions (e.g., "Where is the pig?", "What does the dog say?") alongside peers to enhance overall receptive and expressive language skills. Additionally, during turn-taking activities with the ball ramp and stacking cups, David was guided to identify and express personal pronouns within short phrase structures (e.g., "my" ball, "your" turn) to encourage functional communication and social engagement within the group context. Date / Time	Setting	Child	ICD/CPT Codes	Notes	
08/13/26 In: 12:00PM Out: 12:30PM	Preschool	Brunson, Jeremiah CBRS2627S0093471(ST-I)	F82, F84.0 97530x1 97533x1	Jeremiah required support to transition to the speech therapy room but transitioned well back to the classroom. The therapist engaged Jeremiah in a variety of play-based and structured activities, including his preferred interactive words book, Mega Legos, animal figurines, and the "Around the Farm" book. Throughout the session, Jeremiah required moderate redirections, verbal/visual cues and prompts, processing wait time, and hand-over-hand assistance to facilitate active participation and task completion. Specifically, when engaging with the interactive words book, farm book, and animal figurines, Jeremiah worked on answering basic WH-questions (e.g., "Where is the duck?", "What does the cow say?") to improve overall auditory comprehension and vocabulary expansion. Additionally, during structured interactive play and turn-taking with the Mega Legos, Jeremiah was supported to identify colors and follow simple one-step directions to "put on" and "take off" in building activity.
